PROFESSIONAL SUMMARY

- Frontend Engineer with 5+ years of experience building scalable, high-performance web applications and delivering features for high-traffic platforms.
- Eager to help tech companies build scalable frontend features that promote user retention and boost profitability.

SKILLS

Technical skills: Design systems, API integrations, CI/CD, State management, Agentic AI, Testing, Agile methodologies (SCRUM), Quality Assurance.

Tools & Technologies: JavaScript (ReactJS, NextJS, Typescript, React Native, React Query, NodeJS, StorybookJS), CSS (Tailwind, Shadcn, MUI), Playwright, Claude, Context, Azure, Sentry, Datadog, GraphQL, RESTful, MongoDB, Google Analytics, KeyCloak, SonarQube, Jest.

EXPERIENCE

Senior Front-End Engineer | [Zego Insurance](#) Jan 2025 – Present

- Sole engineer on a flagship product-tier initiative; delivered end-to-end across multiple Python/Scala services, grew price-comparison visibility from one listing to four per search, and lifted sales volume ~34%.
- Led the end-to-end integration of TransUnion Device Risk, a third-party fraud-detection service, enabling the business to identify ghost brokers in real time and significantly reduce fraud exposure.
- Delivered customer-first onboarding flows by running structured A/B tests to optimise conversion and reduce friction.
- Collaborate daily with the Python back-end team to accelerate feature delivery and maintain seamless cross-functional alignment.
- Leveraged AI-powered developer tools (Copilot, Claude) and observability platforms (Datadog, Snowflake) to enhance monitoring, improve code quality, and increase engineering productivity across our frontend stack.

Senior Front-End Engineer | [Hubtel Limited](#) Sep 2023 - Jul 2024

- Led 4 front-end engineers to build an energy vending Marketplace processing GBP 50m+ from 2m+ DAU by implementing RESTful API and payment integrations using Next.js Server-Side Rendering to enhance security, performance and SEO and also Sentry for error tracking.
- Improved sprint velocity by collaborating with the design team to establish a brand guide and owned its translation into a design system using React, NPM and Storybook.js to create reusable components, while ensuring a consistent feel across all products.
- Conducted unit, integration, and system testing on products using Jest and collaborated with the Quality Assurance team on user acceptance testing.
- Boosted code quality by working with the DevOps team to integrate SonarQube into Azure builds as part of the CI/CD pipeline to facilitate proactive detection and resolution of bugs, as well as reduction of technical debt.

Front-End Engineer | [RightCom](#) Jul 2018 – Jan 2019

- Enhanced security and user management efficiency in all RightCom applications using Keycloak for authentication in ReactJS, leveraging its encryption, password policies, and multi-factor authentication.
- Rewrote HTML to meet industry standards for SEO, accessibility, and responsiveness. This overhaul increased search engine ranking, organic traffic, and conversion rate, driving an increase in users.
- Developed responsive UI components and integrated APIs with React Query for a digital signage software, enabling content, screen, and schedule management for companies to display content in multiple locations.

EDUCATION

BSc Degree in Information Technology | Methodist University College

Sep 2009 – Sep 2014
