

KWAME AMPOMA-MENSAH

Senior Front-End Engineer | React · TypeScript · Next.js

London, UK · +44 7535 316817 · kamensgh@gmail.com · [GitHub](#) · [LinkedIn](#) · [Portfolio](#)

PROFESSIONAL SUMMARY

Senior Front-End Engineer with 5+ years of hands-on experience building and shipping consumer-facing products with React, TypeScript, Next.js, HTML and CSS. Built an energy vending marketplace processing GBP 50m+ for 2m+ daily users. Collaborates closely with backend engineers, product and design teams to deliver responsive, performant, user-friendly experiences, and uses experimentation and data to validate new features.

SKILLS

Front-End: React, TypeScript, Next.js (Server-Side Rendering), JavaScript, HTML5, CSS3, Tailwind CSS, shadcn/ui, MUI, React Query, React Native, Storybook, Jest, Playwright

Performance & Monitoring: Web performance optimisation, SEO, accessibility, responsive design, SonarQube, Sentry, Datadog, Buildkite, Google Analytics

APIs & Data: RESTful APIs, GraphQL, API integration, data integration, Node.js, MongoDB, Snowflake, Amplitude, Statsig

Ways of Working: Cross-functional collaboration, experimentation, design systems, CI/CD (Azure), Agile/Scrum, AI tooling (Claude, Copilot, MCP)

EXPERIENCE

Senior Front-End Engineer | Zego Insurance

Jan 2025 – Present

- Sole engineer on flagship product-tier launch; grew price-comparison listings from one to four per search, lifting sales ~34%.
- Collaborated with backend engineers across Python and Scala services to implement APIs and ensure smooth data integration.
- Ran A/B experiments in Statsig on consumer onboarding flows to test and validate new features, optimising conversion and reducing friction.
- Led end-to-end integration of TransUnion Device Risk fraud detection, identifying ghost brokers in real time to reduce fraud exposure.
- Used Datadog and Snowflake data to monitor production performance; adopted Copilot and Claude to boost engineering productivity.

Senior Front-End Engineer | Hubtel Limited

Sep 2019 – Oct 2024

- Led 4 front-end engineers building a consumer energy vending marketplace processing GBP 50m+ for 2m+ daily active users.
- Optimised web performance, SEO and security with Next.js Server-Side Rendering; integrated RESTful APIs, payments and Sentry.
- Partnered with the design team to build a React and Storybook design system of reusable components, improving sprint velocity.
- Owned unit, integration and system testing with Jest; partnered with QA on user acceptance testing.
- Integrated SonarQube into Azure CI/CD pipelines with DevOps, catching bugs earlier and reducing technical debt.

Front-End Engineer | RightCom

Jan 2019 – Jul 2019

- Rebuilt HTML to industry standards for SEO, accessibility and responsiveness, increasing search ranking, organic traffic and conversion.
- Built responsive UI components and integrated APIs via React Query for digital signage software managing multi-location content.
- Implemented Keycloak authentication across React apps, adding MFA, encryption and password policies to strengthen security.

EDUCATION

BSc Information Technology | Methodist University College

Sep 2009 – Sep 2014
